

# MANUAL

## Warming

● **YOUR BOARD CAN LOSE POWER AND BRAKES AT ANY MOMENT** due to radio interference a dead remote battery, unintentional release of the Engage Button, downhill overcharging of a full battery, and other factors.

● **BRAKING DOWNHILL ON A FULL BATTERY MAY CAUSE FAILURE OF BRAKE.** Since regenerative braking will overcharge the battery to prevent this from happening, don't do long distance down hill riding at from the beginning of your riding and ride on flats or uphill to drain the battery before attempting downhill again. Don't go downhill when you can't footbrake.

● **ALWAYS WEAR A HELMET.** Other safety gear, like gloves, pads, and long sleeves, is highly recommended.

● **WARNING:** Always wear a helmet when riding. Never ride in water, wet surfaces, in the rain, slippery or uneven surfaces, steep hills, traffic, cracks, train tracks, gravel, rocks or any obstacles that could cause a loss of traction. Avoid night riding, areas with poor visibility, and narrow spaces.

● **WARNING:** Do not ride a Meepo board at speeds where you would not be safely in control of an unpowered skateboard. In the event of wireless interference or battery fault, you may need to rely on skating techniques like footbraking or sliding to stop. So basically, you should learn FOOTBRAKE. Here is a video to learn footbrake.

## 1 Remote Glossary

- Signal LED light flashes when remote is connected to board.
- Signal LED light stays on when remote is disconnected to board.
- Green Signal LED light means the board is now on forward mode.
- Red Signal LED light means the board is now on backward mode.
- Charging indicator light flashes when the remote is low power
- Charging indicator light stays on in RED when its charge.
- Charging indicator light stays on in GREEN when its fully charged.
- Ride modes can be changed by short press the power button.
- The 4 LED battery indicator lights also show the ride modes
- Beginner mode - 10 mph
- ECO mode - 15 mph
- Expert mode - 25 mph
- PRO mode - 25 mph (beast acceleration)

## 2 Board Glossary
